HARRISONS' — LARGEST GROWERS OF FRUIT TREES IN THE WORLD

**Bud-Selection
THE KEY TO
BETTER FRUITS**

Cutting Buds

Harrisons' "Bud Strains"

Some fifty years ago, and almost every year since, Harrisons' have planted orchards, not alone for fruit but principally to secure the type of parent fruit tree that was characteristic of a "variety" dominant in bearing qualities coupled with health, vigor and ability to withstand changeable climatic conditions. This type of tree became the parent supplying the budding sticks for future orchards in America and true-to-name varieties were assured.

Save Years of Waiting

Bud-Selection Plus Whole Root Propagation Gives Harrisons' Trees Year Ahead Start

The root is the heart of a tree. It enables nutrients in the soil to reach the tops and branches, causing growth. Every fruit tree we sell and grow is scientifically propagated on whole root seedlings, resulting in extra vigorous top and fruit growth. It costs more to grow trees by this method but results are what count. You can count on Harrisons' Trees to give you bumper crops of Quality Fruits years ahead of ordinary trees.

Growing practices do make a difference.

Now is the Time to Plant

U. S. Government authorities are urging a large increase of Family Tree Plantings to take care of the alarming decline of fruit production.

Health authorities recommend eating twice as much vitamin-packed fruit. Many well known authorities predict that within a few years fruit production will be so low that only those who grow their own will have enough to supply their family requirements.

Make your planting this season. Use Harrisons' early-to-bear trees and plants.

Buying Fruit Trees is an Act of Confidence

Your future success and profit from your investment depends on factors you cannot see—the skill and experience of the nurseryman, the type of parent tree that is used in propagation, the willingness of the nurseryman to stand back of every one of his claims.

For 63 years the Harrison organization has been supplying fruit trees to an ever-widening circle of customers, until today Harrisons' Nurseries are the largest growers of fruit trees in the world. This demand we believe is due to the profit-producing proven heavy yielding, bud selected strain fruit trees we are producing plus absolute dependability and square dealings. Thousands of reports from enthusiastic customers, hundreds of year-in-and-year-out customers, are proof that you can depend on Harrisons' Fruit Trees. You buy them without risk and with assurance they will yield you the greatest possible profit.

A Message
From HARRISONS'

Dear Friends:

For sixty-three years the business of the Harrisons' has been to grow Fruit Trees, Roses and Ornamental Nursery Stock, also commercial fresh fruit growers—this business has grown and developed only through a thorough understanding of the science of horticulture in all its phases with practical use.

When it comes to fruit trees, you can buy them at most any price, but the trees that will produce the biggest crop of really worth-while and saleable fruit, cannot be expected from undernourished trees produced in a haphazard manner with the sole idea of seeing how cheaply they can be grown, thus disregarding standard grades, sizes and specifications and careless as to their parentage.

Now when you buy nursery stock—remember all of it is a living plant—the pedigree, or parents, play an important part in the future results of the very tree you buy—the "hidden value" is the inborn inheritance that becomes the final quality, type, strain, size, color and productiveness so necessary in the future performance—and right here is the very feature which makes HARRISON grown nursery products have superior merits.

HARRISONS' Fruit Trees and Small Fruits are true to name, earlier to bear, and yield larger crops because they are scientifically propagated from SUPER SELECTED STRAINS. Likewise, the parent plants used for propagating our Ornamentals are of the finest types for their respective varieties.

In closing, may we personally take this opportunity of thanking our many, many customers for their continued confidence, for which we are sincerely grateful.

Sincerely yours,

HARRISONS' NURSERIES,
Harrison Brothers, Props.
G. Hale Harrison, Gen. Mgr

63 YEARS
LEADERSHIP

OVER 4,000
ACRES

This is Your PROTECTION

Every customer is assured of Harrisons' Hi-Quality Trees and Plants at all times. Expert growing on proper soils, careful digging and packing is Harrisons' policy on every order. Every tree and plant we ship is guaranteed to be strictly first class, free from injurious diseases and insects and to reach you in good condition.

Any time trees or plants are received that do not meet these standards they will be replaced free of charge or your money refunded.

Continued growth depends on soil, weather conditions, planting and after care. After ten days it is mutually understood that the nursery stock is satisfactory; however, we will replace nursery stock that dies from unavoidable causes at half price, if notified within two months after its arrival.

FOR

FALL 1947 WINTER

OR

SPRING 1948 PLANTING

**AT OLD LOW FALL 1946 PRICES—THE SAME PRICES AS LISTED IN ENCLOS-
ED SPRING 1947 CATALOG**

The Cost of Producing Nursery stock like all other agricultural products has increased tremendously during the past year. HARRISON BROTHERS want to give all our customers and friends an opportunity of purchasing at these old prices, and warn our customers that if costs continue to rise it will be necessary to increase our prices for Spring 1948. Order now at these old low prices.

**Last Season It Was Necessary To
Disappoint Many Customers Who
Ordered Late.**

Like last season there is still a critical shortage of fruit trees, berry plants and ornamentals and we suggest that every planter make reservations early. All orders will be shipped during Fall 1947 - Winter 1947 or Spring 1948 at right time for planting in your section. Do not delay and be disappointed. Order Now.

ALARMING SHORTAGE OF FRUIT TREES

Unlike manufactured articles which can be produced in a very short time, nursery stock requires several years to produce and because of the scarcity of labor and supplies during the war years production was cut tremendously.

A recent survey shows that there are far less fruit trees available for planting during the Fall 1947 and Spring 1948 than there has been in many, many years. Order now while all varieties are available.

JUMBO

Fruit Trees Big Roots—Bear Early

Best Trees

OBTAINABLE— Carefully Selected Specimen Trees

NOW everyone can grow extra large rich colored, extra rich flavored, healthful, **VITAMIN PACKED FRUIT** in his own back yard

Time is money, therefore, for the additional expense of a few cents per tree you can plant Jumbo size fruit trees and eat the fruit from them surprisingly soon after planting. The Super-Size fruit trees, being especially grown as Jumbo trees, are the strongest growers. They are exceedingly vigorous, very hardy, and produce tremendous crops of fruit. These are ideal for the home garden.

It takes years to develop these super selected Jumbo size, heavily branched, thickly rooted, early bearing trees and they are the selection of hundreds of thousands of trees in our nurseries.

Even with our expert scientific propagation methods, second to none in the country, coupled with ideal soil and climatic conditions, all varieties and kinds do not develop the same each season, for this reason we can only supply these Jumbo trees in the following kinds and varieties this season. Order early.

ALL VARIETIES LISTED IN ORDER OF RIPENING.

*A bright and PROFITABLE CASH FUTURE
Plant a PEACH ORCHARD
this Spring*

HARRISONS' HARDY PEACH TREES

We absolutely guarantee Harrison-grown peach trees, variety for variety, to be as hardy or harder than trees grown in any locality north of us.

The peach grower has a bright and profitable cash future—we advise you to plant a peach orchard this year, as the number of peach trees in bearing is the smallest of any time during the past fifty years.

THE REASONS BACK OF GROWING SUPERIOR STOCK

- A—Our organization has over 62 years experience.
- B—Every step in growing under the personal supervision of the Harrison Brothers.
- C—One hundred and fifty thousand trees in Harrison Brothers orchards from which our propagating trees are selected.
- D—Use of modern methods for planting, cultivating and digging.
- E—Over 4,000 acres of various types of soil.
- F—Ideal soil and climatic conditions.
- G—Co-operation with leading horticulturists and experimental stations all over the world.

May be assorted varieties of Peach Trees. For Jumbo Peach Trees, see page 3.

RED BIRD

EARLIEST OF ALL PEACHES

Most Popular Extra Early Market Peach

Bright glowing color—"red as fire"—on a background of creamy white.

Handsome. Large—as large as Elberta. Ripens about 45 days before Elberta. Clingstone. Good to eat and fine for pies, cobbles and Peach pickles. Quality good, especially when left on the tree until they get fully ripe.

"Break all young-bearing records." "Break all bearing records." "One crop paid for my whole orchard." "Most profitable early Peach." "Sell fast as can ship." "Better shipper than Elberta."

OTHER VERY EARLY VARIETIES

EARLY ROSE. Very early. Another favorite commercial Peach. White, cling, medium large size for an early Peach. High bright red skin, sweet, delicious flavor. Good shipper, making it a new favorite among commercial varieties.

GREENSBORO. White, freestone, extra large for such an early Peach. One of the handsomest, being large, yellowish white with crimson cheek; flesh is white and of average quality. Exceedingly hardy, being an extra heavy, prolific bearer and adapted for wide variations in Peach regions.

JUNE ELBERTA. A big, handsome red and gold Peach, highly colored, excellent quality and a dandy home Peach, being a new variety. One of the earliest of the good yellow-fleshed Peaches, this semi-freestone variety quickly returns cash dividends before later varieties reach the market.

TRIOGEM. (N. J. 70.) Early, oval, red all over, medium large, yellow, freestone.

RED BIRD—Earliest Large Peach, Commanding High Prices

Peaches

SULLIVAN EARLY ELBERTA

An Early Ripening
Red Bud Sport of
Elberta
MID-SEASON YELLOW

FREESTONE

Here is the early ripening strain of genuine Elberta growers have been wanting. Discovered by Mr. Sullivan in a Georgia orchard. Identical to Genuine Elberta in every characteristic except it ripens about 7 days earlier. Yellow freestone, firm, juicy, rich, good flavored. Equally attractive as Elberta and is a good keeper. Good for either home or commercial planting.

Stark Early Elberta

Early mid-season. Yellow, freestone, large, lemon-yellow with a dark cast, blush with vivid red. Beautiful appearance, high quality, being somewhat similar to Elberta, although a trifle better flavor, rich golden tender flesh, yet firm and has a delightful flavor; excellent for canning.

A NATIONAL SCARCITY OF FRUIT TREES

There is a drastic shortage of fruit trees throughout the nurseries of the United States; as a matter of fact, the smallest supply available for 1947 orchard plantings that there has been at any time during the past fifty years. A recent national survey shows that fruit trees will even be more scarce during the next two years than now. Play safe—act quick—place your order now while trees are available.

YOUNGER BEARING

Do you want your trees to come into bearing at an early age? It is a recognized fact that trees propagated direct from bearing trees will commence to fruit at an earlier age than trees that are propagated from non-bearing scions. Harrison Grown Fruit Trees, due to the fact they are budded from bearing trees, will produce profit-paying crops in the earliest possible time.

Harrison's volume production has enabled us to supply you with high quality nursery products at low prices. All varieties are within reach of any home planter and fruit grower and priced to save you money. We ship everywhere. State and Federal inspected.

Sullivan's
EARLY ELBERTA
The New Early
Ripening Elberta

Early Mid-Season Peaches

CHAMPION. A Good Home

Peach. White, freestone, very large; creamy white with red cheek, sweet, juicy, very high flavor. Champion has lost its past commercial importance because it will not carry satisfactorily under refrigeration, but as a home garden or a roadside Peach, it is one of the best. Tree is hardy, large grower and productive.

GOLDEN EAST. (N. J. 87.) Early mid-season. Very large, high red color, yellow, freestone.

ROCHESTER. Early mid-season. Yellow, freestone, large, covered with mottled red blush; flesh yellow stained with red at pit, very good quality, prolific bearer. One of the best early mid-season yellow freestone Peaches for nearby markets, and highly desirable for canning.

SOUTH HAVEN. Early mid-season. Yellow, freestone, large, handsome, uniform size, delicate flavor, ripens about 15 to 18 days ahead of Elberta. Tree is very hardy, good grower and a consistent heavy bearer, adapted to cold climates; produces bumper crops in mild climates.

VALIANT. Early mid-season. Seedling of Elberta Yellow freestone, productive. A new Canadian variety.

CUMBERLAND. An outstanding favorite early white Peach. Is a comparatively new, white, nearly freestone variety that was developed by the New Jersey Experimental Station. The fruit resembles Belle of Georgia, both in appearance and quality, although it ripens about the same time or a little before Golden Jubilee.

REDHAVEN PEACH
—They Taste as
Good as They Look

The Sensational **REDHAVEN**

**Tops All Extra Early Peaches, Earliest Yellow
Freestone Peach**

**THE NEW EARLY RIPENING YELLOW PEACH THAT
RIPENS ABOUT 10 DAYS BEFORE GOLDEN JUBILEE**

The most promising early ripening yellow freestone Peach ever introduced. A cross between Hale-Haven and Kaimhaven made at the South Haven, Michigan, Experimental Station. Brilliant red color with creamy yellow background, smooth skin, almost fuzzless. Reddens before it ripens. Bears heavy crops and should be thinned for best results. Every grower should try REDHAVEN. We have a good supply of genuine Redhaven trees this season. The demand for this variety is heavy, so order early.

HALE-HAVEN PEACH—Extra Large, Fine Flavored

**HARRISONS'
SUPER QUALITY
FRUIT TREES
BEAR HEAVIEST
GROW FASTEST
AND
LIVE LONGEST**

Hale-Haven

Early mid-season. Ripens just after Golden Jubilee has been harvested and about 14 days ahead of Elberta. Yellow freestone, large, high red color, firm, fine flavored. It takes on red color early and the peaches show good red color several days before ripening, which gives it a distinct advantage for marketing. When allowed to ripen fully upon the trees its flavor is undoubtedly the best of any yellow Peach. Tree is an extra strong grower and produces a bumper crop of fruit each season. Very hardy in fruit bud. One of its parents is J. H. Hale, from which it inherits its large size and fine color. The other parent is South Haven from which it attains hardiness, large crops yearly and strong growth. It is the best variety ripening between Golden Jubilee and Elberta and should be planted in every orchard.

GOLDEN JUBILEE PEACH—Yellow, Excellent Quality

A LEADER and What a PEACH!

GOLDEN JUBILEE

Early. The supreme early yellow Peach. Commercial Peach orchardists for a century have been looking for an early Peach of high quality, fine flavor, yellow, freestone, attractive color and firm texture, and eventually they have found it in the marvelous Golden Jubilee. This variety is a variation of recent introduction of new varieties and is by far better than any early variety of commercial importance which has been introduced in many years. It ripens about four days ahead of Carman.

**FOR JUMBO PEACH TREES,
SEE PAGE 3.**

Red Bird

Earliest of All Peaches

Very early. White, early extra large with a bright red blush. The Red Bird is large size to ripen. The greatest variety of early peaches available. A true freestone.

**Harrisons' Maryland Grown
Fruit Trees are the
Finest Quality in the World**

Elberta TOPS PEACH SALES

**Sensational
Standard Peach
of the World**

It's the Greatest Money Maker

(Original Strain) **ELBERTA**

**Internationally Famous—The Standard by Which All
Other Peaches are Judged**

Mid-season. Yellow, freestone. Fruit is large to extra large; golden yellow with brilliant shades of red; firm, juicy, rich, sweet and good flavor. Elberta has the greatest international reputation of any Peach. It has been the standard for all other Peaches almost since the date of its introduction. The coloring of Elberta is practically perfect. The rich, yellow skin is almost entirely covered with dark red blush upon the sunny side. The attractive appearance and the uniform large size serve to sell it almost on sight. We offer original strain trees which is the best strain obtainable.

Harrison ORIGINAL STRAIN Elberta**

Today, there are more than seven distinct types and strains of Elberta, bearing fruit in the orchards of this country. To compare the various sizes, shapes, texture and red coloring of these Elberta with those grown "on original strain trees" gives sufficient reason why they sold this year at a premium of \$1.00 to \$2.00 per bushel on the New York and other leading fruit markets.

**HILEY WHITE—EARLY
MID-SEASON**

Bears huge crop of fancy Peaches. White, freestone, medium size, highly red colored and is a very handsome Peach of exceptionally good flavor. Tree is strong grower, very healthy and an extra heavy bearer. You can depend on Hiley to bear heavy crops year after year. The marvelous color and wonderful flavor have made it popular on the markets. Hiley resembles Belle of Georgia but ripens about ten days earlier.

**BELLE OF GEORGIA
The Finest

The Leading Peach**

**America's No. 1 Peach—Elberta. There are more Elberta
Peach trees in bearing than any other variety on earth.**

FOR JUMBO PEACH TREES, SEE PAGE 3.

Belle of Georgia

The Queen of Flavors

THE BEST WHITE MID-SEASON VARIETY

Ripens mid-season. Color creamy white with red cheek. Flesh white, red near pit. Size large, freestone. Belle of Georgia, for some time, has been recognized as the best all-around white Peach on the market. It is easily the best shipping white Peach of its season, ranking almost with Elberta in this respect. Because of its many desirable qualities, it has become standard in the large commercial orchards, and you can find few orchardists of any importance who do not have a block of Belle in their orchards. These men know from experience just what varieties pay best and endorse it highly.

Harrisons' Peaches

ARE A COLLECTION OF
THE WORLD'S BEST

Late Ripening Varieties

RACKETT. Mid-season late. The fruit is rich yellow with dark carmine cheek. Size is as large or larger than Elberta and much better flavored. Ripens 7 days later than Elberta.

LIZZIE. Late, distinct type of Elberta, very large, freestone, yellow, which ripens 24 to 26 days later than Elberta, having same prominent coloring characteristics as its parent.

SALBERTA. A Late Commercial Peach. Yellow, freestone, large, being a satisfactory cross between Elberta and Salwey. Salberta inherited the size, quality and productiveness of Elberta, and inherited the lateness in season of Salwey. This new variety is being planted commercially in many Peach-growing sections. Ripens about 20 days later than Elberta

SHIPPERS LATE RED. Mid-season late. Large, round, yellow freestone; very attractive. Ripens 3 days later than Elberta

RIO-OSO-GEM. Late. See page 9 for description and prices Starts to ripen 14 days later than Elberta.

VERY LATE RIPENING VARIETIES

KRUMMEL'S (Krummel's Late October). Yellow, freestone, extra large, round, deep yellow with a blush of carmine on the sunny side—fine flavor.

SALWEY. Very late. Yellow, freestone.

WHITE HEATH CLING. Large, late cling, fine flavor, good home Peach.

J. H. HALE
Giant Size,
Enticing Flavor

NATIONAL
J. H. HALE *Reputation*
originated by the Late PEACH KING

MID-SEASON—Ripens 2 to 3 days before Elberta.

Original Strain J. H. HALE

Our "Hales" are propagated direct from the original strain, the variety originated by the late J. H. Hale of South Glastonbury, Connecticut and Fort Valley, Georgia, known as the Peach King of America. There are many types and strains of J. H. Hale grown, but the only one worthy of commercial importance is the original strain, which is the extra large, round, highly colored Peach. The original strain necessitates cross-pollenization and it is necessary, for proper results, to plant a few Belle of Georgia or Hiley along with Hale for cross-pollenization.

Extra Large Size Yellow, freestone, extra large beautiful red coloring, firm and of the highest quality and enticing flavor J. H. Hale ripens about two or three days prior to Elberta

RIO OSO GEM

PROLIFIC BEARER—RIO-OSO-GEM PEACH

RIO-OSO-GEM

Ideal for Home Orchards TWO WEEKS LATER THAN ELBERTA

The Rio-Oso-Gem would be a Peach of commercial importance when ripening at any time during the Peach season, but it is very fortunate that it ripens two weeks later than Elberta, which puts it at a time when there is no other variety of commercial importance as a competitor, and fills a long looked-for gap in commercial production, ripening when the markets are clamoring for Peaches—this variety has sold at very much higher prices than Elberta and J. H. Hale. To prolong your Peach shipping season, we highly recommend to you planting the Rio-Oso-Gem. Harrisons' have planted twelve thousand Rio-Oso-Gem in their own famous orchards. We have the utmost faith in the Rio-Oso-Gem, and we will also make future plantings of this remarkable Peach.

There is a brilliant future in store for the progressive orchardist who plants Rio-Oso-Gem Peach trees.

Protected by U. S. Plant Patent No. 84

Exclusive Propagation and Sales Rights of the Rio-Oso-Gem in the Following States Granted to Harrisons':

Alabama, Arkansas, Connecticut, Delaware, District of Columbia, Florida, Georgia, Kansas, Kentucky, Louisiana, Maryland, Maine, Massachusetts, Mississippi, New Hampshire, New Jersey, New York, North Carolina, Oklahoma, Pennsylvania, Rhode Island, South Carolina, Tennessee, Texas, Vermont, Virginia and West Virginia. Also sales rights in Ohio, Indiana, Illinois, Missouri.

**COMMERCIALLY TESTED
America's Highest Price Peach
PLANT NOW! 1947**

The World's Largest Peach

An amazing feature of the Rio-Oso-Gem is, it will take on a good bright red color and yellow background two weeks before ripening, and even ten days before actual ripening time the percentage of bright red color is decidedly more than most other varieties. When Rio-Oso-Gem is ready to pick and ship it has practically a solid red color. There is no other Peach known that carries such a high percentage of red color on the fruit as this marvelous Rio-Oso-Gem.

EXPERT FRUIT GROWERS SAY O. K.

Rio-Oso-Gem has now fruited in practically every Peach district of the Union. Veteran Peach growers of the nation are loud in their praise of this startling variety. Rio-Oso-Gem has passed the experimental stage and proven an outstanding commercial variety, superseding the famous Elberta of the Victorian era.

BIGGEST PEACH ON EARTH

The Rio-Oso-Gem is a perfect freestone, form is globular, slightly elongated, of extremely large size, averaging in diameter from 2 3/4 to 3 3/4 inches, deep yellow flesh, very fine grain, firm texture, with very excellent flavor, being rich, sweet and slightly spicy. The coloring is unique, being a beautiful dark crimson-red, running out to lighter crimson and into a rich mottle of crimson over the orange-yellow ground color. It is a good transcontinental shipper.

Harrisons' APPLE TREES

for the APPLE INDUSTRY

Apple Growing Pays Profits

BUT in order to get these profits, it is necessary to start with the best trees and the most desirable varieties. Harrisons' Nurseries have been, and are still growing, at Berlin, Maryland, the finest and best apple trees of superior merits it is possible to produce. Harrison-grown apple trees are propagated on whole root stock, insuring an unusually large root system which is the basis of plant growth. Our apple trees are scientifically budded from selected heavy bearing strain trees of the variety desired, using the bud selection system. Today we believe that we have more of the improved and best strains of Apples in our nursery than any nursery concern in America. Do not allow a few cents per tree to keep you from buying Harrison-grown Apple trees, the finest and by far the best quality produced on the North American Continent

TRUE TO NAME

The World's Foremost Fruit Variety Identification Specialists Have Examined Harrison-Grown Trees and Pronounced Them True to Name.

In addition to carefully selecting the propagating wood from bearing trees of superior strains, we have also employed the services of Dr. A. P. French, Dr. O. C. Roberts and Dr. L. Southwick, professors of Pomology of Massachusetts State College, Amherst, Mass. These men are the world's foremost fruit identification specialists and they have pronounced our trees true to name

Little Orchards Make More Profit Than Big Farms

TODAY FRUIT GROWING is gaining on the big farms—little orchards lead the way to a profitable and worth-while fruit market

RESULTS COME SEVERAL YEARS HENCE

No one can measure in advance the future results of a newly planted orchard. A few years must come and go before the trees bear fruit. A good inheritance immediately qualifies it as a money-maker, fruit is large and true-to-name. Poor trees at any price never give satisfaction.

Sixty-three years of dependability and square business dealings finds Harrisons' today the best place in America to buy truly dependable trees.

Millions of Harrisons' "bud selected" fruit trees planted throughout the years are today the very backbone of a profitable and dependable fruit business in all sections of the country

HARRISONS' TREES HAVE A GOOD RESERVE OF PLANT FOOD

Harrisons' trees are scientifically nurtured so that the trees will absorb the different latent plant growth elements so vitally necessary in the successful growth of trees after transplanting. This stored-up energy is one of the many reasons why Harrisons' trees prove successful wherever planted.

HARRISONS' HARDY APPLE TREES

We absolutely guarantee Harrison-grown apple trees, variety for variety, to be as hardy or harder than trees grown in any locality north of us.

Harrisons' Super-Selected Trees

with their unusual substantial root system, are proving again and again that "bud selected" strains spell yearly profits to orchardists and commercial planters.

Alarming Apple Orchard Shortage

U. S. Department of Agriculture census figures reveal—"146,000,000 fewer Apple trees on U. S. farms and orchards NOW than in 1910, although the population of the United States has increased by 59,000,000! And of the trees now on U. S. farms and orchards, many are trees that will rapidly pass out of profitable production!"

Plant "Bud-Selected" Super-Strain Trees

**More fruit prizes are won on fruit grown in orchards planted with
Harrisons' fruit trees than any other.**

Harrisons' Bud Selected Apple Trees Bear Fruit Quick

Yellow Transparent

It's a Summer Apple—First of the Year

**Ripens Early, Skin Clear Yellow, Flesh White,
Flavor Slightly Acid, Size Medium**

This is the most popular early green apple grown and has proven a profit maker in a large number of apple districts. The Yellow Transparent tree is very hardy and somewhat of a dwarf grower, bears when very young and makes an excellent filler. We believe there is a big future for the grower who plants this variety; we ourselves anticipate planting several hundred trees of Yellow Transparent this year.

Yellow Transparent First On the Market

As it ripens early in July, making excellent eating apples and selling without difficulty. There is almost no competition at this time; Yellow Transparent leads the field, and is eagerly sought for by those people who find their "apple appetites" impatient.

OTHER SUMMER APPLES

EARLY RED DUCHESS. Highly colored early apples bring premium prices. This bud sport colors red all over early in the season.

RED SUMMER RAMBO. Harrisons' new early coloring bud sport. This new strain is much superior to the ordinary Summer Rambo.

WEALTHY. Medium to large size; round, almost solid red; flesh white or a little stained; tender, crisp, juicy, fine grained, aromatic and very good flavor. Relatively good keeper. Old variety most extensively planted in North. Tree is very hardy, withstanding unusually cold climates, vigorous, fruits at early age, bears regular and abundant crops. Tree somewhat dwarf, making a fine filler.

STARR. Large, attractive with bright yellowish smooth skin; sometimes marked with a faint blush and numerous russet dots; flesh yellow, fine, very tender, crisp, juicy, aromatic and of extra fine quality, bringing highest prices. Recommended to those with nearby markets, but a poor long distance shipper. Popular in Southern New Jersey.

A NATIONAL SCARCITY OF FRUIT TREES
There is a drastic shortage of fruit trees throughout the nurseries of the United States; as a matter of fact, the smallest supply available for 1947 orchard plantings that there has been at any time during the past fifty years.

A recent national survey shows that fruit trees will even be more scarce during the next two years than now. Play safe—act quick—place your order now while trees are available.

GOOD FALL AND WINTER APPLES

STAYMAN WINESAP *Big Yield Strain.* Without a doubt the heaviest yielding strain of Stayman Winesap obtainable. This strain yields bumper crops year after year. It colors to a good bright red and gets nearly solid red colored when allowed to stay on trees until fully ripe. This is an improved strain and is preferred by many growers in the East. Tested and time-proven by thousands of growers.

SMOKEHOUSE. Large apples of superfine flavor, excellent for eating, yellowish green mottled with dull red and with many russet dots; flesh firm, crisp, juicy and aromatic. Tree large, vigorous and reliably productive.

WINESAP *An Apple Favorite in Virginia.* Sometimes called Old Winesap and Virginia Winesap. Medium size, oblong, smooth, and a fine dark red—one of the best red colored apples grown; flesh yellow, crisp, tender, very juicy, aromatic, firm and of excellent flavor. Very long keeper and considered the best cold storage variety, keeping until July. Strong grower; comes into bearing early. Our strain produces bumper crops of the larger sized apples with plenty of color.

YORK IMPERIAL. Medium to large size, round, irregular, greenish yellow overlaid bright red; flesh tender, firm, crisp, of high flavor; wonderful keeper. Keeps in cold storage until June. Vigorous grower, strong and healthy; an unusually heavy bearer.

BALDWIN. Large, red, yields big crops; good keeper. Winter.

JONATHAN. Medium to large, red, juicy. Good keeper and an excellent shipper.

LOWRY. Beautiful mahogany-red, good, medium size, round oval shape, nearly sweet, mild sub-acid; excellent flavor, good shipper, long keeper, and sells at fancy prices in export as well as domestic markets. New popular commercial variety in Virginia

MAMMOTH BLACK TWIG (Paragon). Extra large in size and round; skin smooth, yellowish covered with deep red, the general effect being dark red; flesh tender, tinged with yellow, crisp, sub-acid, aromatic, fine flavor, of excellent quality, long keeper of great value. An important commercial variety in the East. Tree is vigorous and healthy, yields big crops. Plant Delicious or Jonathan as a pollinizer.

NORTHERN SPY. Large, bright scarlet-red, with yellow markings. Flesh juicy, rich, crisp, tender, aromatic and highly flavored. Tree a strong erect grower, very healthy, extremely hardy and a free producer. We offer an exceptionally heavy bearing strain that comes into bearing at an early age.

NORTHWESTERN GREENING. Large, round, greenish yellow; juicy, firm, good quality; splendid keeper, ships well. Attractive apple when packed in bushels, demands good prices, excellent baking apple. Should not be planted extensively, because crops are not so certain, due to blossoming early. Trees are extremely hardy, vigorous, and bear very young.

RHODE ISLAND GREENING. The Popular Northern Apple. Large, greenish yellow; flesh crisp, juicy, quite acid, firm, fine grained, tender, and of very fine flavor and quality. An excellent keeper, a popular barrel apple, brings good prices. Generally planted in New England, New York, Michigan and Canada, but not advisable to plant south of the Mason-Dixon line.

ROME BEAUTY. Large, round, red, flavor and quality above average.

Buying Fruit Trees is an Act of Confidence

Your future success and profit from your investment depends on factors you cannot see, the skill and experience of the nurseryman, the type of parent tree that is used in propagation, the willingness of the nurseryman to stand back of every one of his claims.

For 63 years the Harrison organization has been supplying fruit trees to an ever-widening circle of customers, until today Harrisons' Nurseries are the largest growers of fruit trees in the world. This demand we believe is due to the profit producing, proven heavy yielding, but selected strain fruit trees we are producing, plus absolute dependability and square dealings. Thousands of reports from enthusiastic customers, hundreds of year in and year out customers, are proof that you can depend on Harrisons' Fruit Trees. You buy them without risk and with assurance they will yield you the greatest possible profit.

TRIPLE RED DELICIOUS—Finest Flavored, Best of All

SOLID RED WINESAP—Fine Flavored, Long Keeper

**SCARLET RED
STAYMAN**

BRILLIANT COLOR

We offer to the public the greatest strain of Stayman Winesap ever discovered. It is a true bud sport found in a Stayman Winesap orchard. Scarlet Red Stayman takes on bright red color weeks earlier than ordinary Stayman. Its ripening date is the same but can be picked earlier if desired.

A Ready Market at Top Prices

Scarlet Red Stayman is the best general purpose Apple for planting in the East. Its solid scarlet-red color and its bright attractive finish causes it to command highest market prices. The fruit is large and it produces bumper crops each year.

SOLID RED WINESAP

Old Winesap generally has plenty of color when planted in most sections, but for those growers who want a more solid red-colored Winesap, we recommend our new strain.

**THE APPALACHIAN WINNER
RED YORKING**

(U. S. Plant Patent No. 125)

The Red Yorking is a "bud sport", being a mutation of the famous York Imperial. This "bud sport" originated on a tree, grown with other York Imperial trees, in Harrisons' Nurseries and later sold to Mr. W. H. Allison, near Shippenburg, Penna., for use in planting a large orchard about 40 years ago.

and BEST RESULTS

RED YORKING—Big Crops

RED VARIETIES

Flavored Apples

HOME OR COMMERCIAL ORCHARDS

RED SPY—Bears Crisp, Juicy Apples

RED SPY

A new "bud sport" from New England. Identical with the ordinary Northern Spy in fruiting habit. Extra large size fruit, strong, vigorous, hardy trees. Comes into bearing earlier than the ordinary strain. Colors early, nearly every Apple being solid red in color. We recommend it for commercial and home plantings in northern states.

**GET YOUR
ORCHARD STARTED
THIS YEAR**

McINTOSH RED

**Improved Type—Heavy Yielding
Strain Preferred by Many
Growers in the North**

Until the discovery of our New Super Red McIntosh our improved McIntosh Red was the best strain of McIntosh available. It colors solid red when climatic and soil conditions allow it to remain on the trees until it is mature. This heavy yielding strain is much superior to any strain of McIntosh, especially the dull striped kinds. If you do not have trouble getting sufficient color then we recommend you planting this time-proven, heavy yielding strain. McIntosh Red is very hardy and produces bumper crops each year. Generally considered as the best flavored Apple grown. Recommended for home or commercial orchard plantings.

RED ROME BEAUTY
Quality and Appearance

RED ROME BEAUTY

An improved Rome Beauty, identical in vigor and production. Color of fruit much brighter and solid red. Produces much higher percentage of fancy apples and also superior in quality to the ordinary strain of Rome Beauty. Red Rome Beauty is renowned for bearing at a very early age, producing bumper crops of large size apples. The tree is a vigorous, strong grower, exceedingly hardy. Pacific Coast strain.

BRIGHT RED JONATHAN

We searched the country over to find a strain of Jonathan that had more color than our selected Big Yield Strain Jonathan. After thousands of miles of travel inspecting all of the new strains of this famous variety we found the one we had been looking for. It colors solid red several days earlier, otherwise it is identical with ordinary Jonathan. Growers who want more, deeper colored apples will find our Bright Red Jonathan the best colored strain obtainable.

SUPER RED McINTOSH

An improvement on our already famous strain of McIntosh Red. Color is brilliant solid red and commences to color weeks earlier. Best "Red Bud Sport" Strain.

Grown by
**HARRISON BROTHERS
BERLIN, MARYLAND**

McINTOSH RED
Unexcelled Flavor

BRIGHT RED JONATHAN—A Treat to Eat

SUPER RED McINTOSH—A Northern Favorite

"Bud Selected" Apple Trees Bear Larger Crops of Quality Fruit

OTHER FAMOUS APPLES

EARLY McINTOSH. Resembles its McIntosh parent in appearance, but is less aromatic. An attractive uniform red color, good size, flesh white, tender, and juicy. The trees are vigorous, hardy, healthy, productive, and bear annually if thinned early and severely. The shape and framework of the tree, especially the heavy-butted branches, are like those of McIntosh. The crop ripens ten days later than that of Yellow Transparent. The fine flavor is similar to that of famous McIntosh Red.

DOUBLE RED BALDWIN. A new dress for this old reliable variety. Solid deep red color, much earlier than ordinary Baldwin. The color makes it sell better. This new strain will bring new profits to the grower of Baldwins. Late fall.

RED GRAVENSTEIN. This red sport is more attractive than Gravenstein. It differs from Gravenstein only in the solid dark red fruit. Late summer.

CORTLAND. A new variety resulting from cross pollenization of McIntosh Red and Ben Davis, and inheriting the good qualities of each parent. Beautiful red Apple, approximately the same size and fine flavor of the McIntosh, but ripens three weeks or a month later. Good keeper.

GALLIA BEAUTY. A Rome Beauty type of Apple identical in every respect, except its earlier coloring qualities; recommended for commercial planting. Harrisons' have the genuine original strain of Gallia Beauty.

YOU TAKE NO CHANCES IN PLANTING HARRISONS' TREES

Fruit trees are continuously propagated from the nursery rows, because it is cheaper, fruit trees can't degenerate and when the original was a poor type, the nurseryman, without knowing it, continues to reproduce poor, undesirable, small type fruit. Incidentally, in case there was a mixture in the nursery rows, how could a nurseryman propagate true-to-name trees successfully? We are orchardists and nurserymen, and nothing can compare with our own scientific method of "bud selections"—it always gives complete satisfaction and spells profit for the fruit farm.

BETTER RESULTS Right From the Start with HARRISONS' HI-QUALITY APPLE TREES

LARGE TRANSPARENT (LODI)

A New Summer Variety

Ripens Very Early — Destined to Replace the Ever Popular Yellow Transparent

We believe there is a big future for this new summer Apple. Our commercial friends should lose no time in anticipating the demand for an Apple of this type.

Somewhat of a dwarf grower, bearing very young, it makes an excellent filler. The skin is a clear yellow, white flesh, of medium size.

EARLY APPLE GROWERS MAKE MORE MONEY WITH LARGE TRANSPARENT

Yes, actual profits, that's what we mean. It can be done—here's why: Yellow Transparent Apples are always first on the market and generally bring good profits when they attain proper size. Size on Yellow Transparent is hard to get, but easily on its Big Brother, "Large Transparent," which ripens at the same time.

Large Transparent Apples Average up to 1/2 Inch Larger Than Yellow Transparent
This Means 75c to \$1.00 per Bushel Extra.

GRIMES GOLDEN

Harrisons' Selected "Big Yield" Strain — Best Home Orchard Apple

Autumn, medium sized, golden yellow, tender, rich, aromatic, sub-acid, delicious, possibly the best flavored Apple known, and a good keeper. No better variety exists for eating raw or for cooking. Tree is very hardy and one of the heaviest bearers known, producing extra large crops annually. Excellent variety for a filler, as it comes into bearing very early. Grimes Golden is the best pollinizer known, especially for Stayman Winesap, Turley, Baldwin, Cortland, Rome, Winesap, McIntosh and others. Be sure to include Grimes Golden in your orchard. IT IS EASY TO GROW.

YELLOW DELICIOUS *It's Golden!*

A golden yellow Apple with decided "Delicious" characteristics. Yellow Delicious has a remarkably good flavor, and is most popular for eating during the fall and winter months. Late September and January finds it at its best. Many people think it superior to the famous Delicious. Fall.

A Prolific Cropper at an Early Age

The Yellow Delicious tree is very thrifty, hardy, and a vigorous grower. It is renowned for its heavy bearing of fruit at a very early age. You can depend on a good yield of ripened fruit each year.

DELICIOUS

Sometimes Called Stark Delicious—This is the Original Strain of Red Delicious

Of peculiar and distinctive shape; brilliant dark red, flesh fine grained, juicy, crisp and melting; flavor sweet, with a slight acid taste, with a delightful aroma. Very highest quality. Fall.

FOR JUMBO APPLE TREES, SEE PAGE 3.

CRAB APPLES

Priced on pages 3 and 10.

Double Purpose—An Ornamental and Fruit Tree Combined

HYSLOP. Deep crimson, large size, sub-acid and of good quality. Fine for all kinds of preserving, canning, etc., and good to eat fresh. Tree handsome.

TRANSCENDENT. Yellow striped with red; good for eating fresh and fine for preserving. Best of all Crab Apples. Tree large; quick grower.

GRIMES GOLDEN—Big Crops, One of the Best

The Big Red Home or Market Apple

Just at the time when people are
hungry for a fresh, new red Apple,
this superb sort comes into market.
In New York, Boston, Philadelphia,
and other eastern cities the fruit sells
as quick as it hits the market-house
or dealer's store. It holds its own
anywhere and has proven to be—

The Best Summer Apple

The rich bright red fruit catches
the buyer's eye and is ordered at a
price that yields the grower a good
profit. Apple is large, with tender,
crisp, white flesh, juicy, slightly tart.
The trees come to bearing when quite
young, producing freely and steadily.
Fine for a filler or permanent tree,
and being hardy, can be successfully
grown in New England states and
Canada. All orchards should include
Williams Early Red.

HARRISON'S' famous PLUMS

AMERICA'S BEST VARIETIES

NEW LOW PRICES

SUNDANCE

Early, medium size, garnet-red color, thin bloom, flesh light yellow, somewhat meaty, sweet, aromatic. Trees are healthy, hardy and productive. An early market Plum.

BRADSHAW. Mid-season, large, dark violet-red, juicy, excellent flavor. Desirable for canning.

BURBANK. Early, about one week later Abundance. Fruit very large size, round, purplish red, flesh reddish near skin, firm, juicy, and has a pleasant tart flavor, of exceptionally high quality.

ITALIAN PRUNE (Fellenberg). Late, medium size, freestone dark purple, delicious. Fine for drying.

GRAND DUKE. Late. Commercial variety, purplish black, juicy, sweet, excellent for cooking.

LOMBARD. Mid-season. Medium size, showy purplish red fruit, excellent quality for canning, cooking, preserving or spicing. Prolific cropper.

ED JUNE. Early, medium size, garnet-red color, thin bloom, flesh light yellow, somewhat meaty, sweet, aromatic. Trees are healthy, hardy and productive. An early market Plum.

SANTA ROSA. Early. Fruit very large size, round, purplish red, flesh reddish near skin, firm, juicy, and has a pleasant tart flavor, of exceptionally high quality.

HIRO (Early Gold). Early. Fruit is very large, golden yellow, semi-transparent, covered with bright scarlet-red blush.

THROPSHIRE DAMSON. Late, medium size, dark purple. Very productive. The best for preserving. The popular old-fashioned Damson variety.

STANLEY PRUNE. Mid-season. Freestone, large, new Plum variety, outstanding characteristics. Considered best for cooking and fresh fruits.

WICKSON. Mid-season. Extra large size, color dark red, thin bloom, flesh amber-yellow, firm, sweet.

YELLOW EGG. Late. Large, golden yellow. Good for cooking. Largest and handsomest of yellow Plums.

Extra Good Fruits for the Home Garden

APRICOTS

The Apricot is one of the most delightful luscious fruits grown, when eaten fully ripe and fresh from the tree. It is remarkable that such a rich and beautiful, golden, sweet fruit is not planted more, especially since it ripens just after the early Cherries and before the best early Peaches.

ALEXANDER. Early, prolific, freestone, orange, with red blush; very juicy and sweet flavor. A large prolific sort that will withstand adverse weather conditions. This variety deserves greater popularity. The best.

EARLY GOLDEN. Pale orange, juicy and sweet. Is a hardy, prolific bearer; ripens first of July.

SUPERB. Very good quality. Fruit is beautiful, light salmon colored; best of the older varieties. Tree is large very thrifty, hardy and is extremely productive of fruit.

NECTARINES

Delicious for Eating

There is a mistaken idea that the Nectarine is a cross between the Peach and something else, while it is really nothing more or less than a smooth-skinned Peach. The melting, juicy texture of the Nectarine and its delicious flavor furnishes one of the most delightful fruits for eating during the summer. Plant a few trees in your home orchard this year.

HUNTER. Large, round, yellow, freestone

SURE CROP. Very vigorous and productive. The fruits are large, roundish, white and overlaid with very attractive red. Very pleasing flavor.

Fancy BARTLETT PEARS

ALWAYS TOP

- 1—Superb Quality
- 2—Heavy Cropper
- 3—For Home or Commercial Grower
- 4—For Eating and Canning
- 5—Bear Early
- 6—A Harrison Brothers Specialty

For home, for canning, for market, the best. Ripens during summer.

A golden colored Pear, with a red cheek on most specimens. Bartlett mellows and is excellent for eating very early in the fall, yet when picked a week before it is ripe, and properly stored, will keep till late. Flavor delicious and musky; flesh buttery, rich and juicy. One of the finest Pears that grows, to eat raw. A mingling of the flavor of Bartlett Pear and Quince gives about the finest taste of any food this world's folks have. Bartlett trees bear early, produce enormous crops, and are not nearly so subject to damage by insects and disease as some other sorts. The trees do especially well with high culture.

Fancy Bartletts Bring Highest Prices

Bartlett Pears always sell on the markets even when other sorts are not in great demand. The fruit is so handsome and appealing that it pays to pack it in fancy containers. Bushels or bushel boxes are best adapted. The fruit ought to be sorted and graded, wrapped in tissue paper, and arranged in the container practically the same way that you pack Apples. Pears are sometimes packed in Peach carriers, and sell to good advantage. Plain fruit can be sold without wrapping, in small baskets or boxes.

One or two Bartlett Pear trees in the city yard will furnish a considerable amount of fruit; a half dozen will supply the family with fresh fruit and a surplus for preserving.

KIEFFER

SURE CROPPER—EASY TO GROW

Of all the Pears, Kieffer is the most easily grown. Trees are vigorous, exceptionally hardy and thrive on varied soils in any climate. Kieffer and Koonce are the only Pears that can be successfully grown in such southern states as Alabama, Mississippi, Louisiana, etc., and yet it is the leading commercial Pear in Canada. Kieffer is blight-resistant, and can be successfully planted in large orchards.

This fruit is large to very large size; skin yellow, with light vermillion cheek; flesh yellowish white, very juicy. Noted for being a long time keeper. Most popular canning Pear.

BEURRE BOSCH. Large size, fine quality, brings highest market price. Late.

BEURRE D' ANJOU. Large, green in color, somewhat yellow when ripe, buttery, melting, rich, vinous, good flavor. Tree vigorous, hardy, prolific bearer. Very late.

CLAPP'S FAVORITE. Large size, hardy and very productive. Thrives where other varieties fail. Very early.

DOUGLAS. Very resistant to blight. A winter Pear of wonderful quality, golden yellow with a faint blush on the cheek. Bears early.

DUCHESSE. Very large, dull greenish yellow. Tree somewhat dwarf but a dependable bearer. Late.

GORHAM. Flavor is sweet and vinous with a very marked and pleasing aroma. Flesh is white, tender, buttery and juicy. Valuable for dessert and canning. New.

KOONCE. One of the earliest Pears, free from blight, does not rot at the core like many early Pears. Fruit is yellow, medium to large, delightful flavor. Very productive. Extra good for southern states.

SECKEL. A beautiful and delicious little Pear. One of the richest and highest flavored Pears grown. Tree dwarf, bears prolific crops. Late.

WORDEN SECKEL. A seedling of Seckel. Superior in size and color. Mid-season.

Harrison's' Berlin, Maryland Grown Fruit Trees ARE HARDY IN ANY CLIMATE

SOUTH HARRISON'S Montmorency Cherries

EASY TO GROW

Montmorency

Cherry grown in America. Red, slightly acid, flesh the best shipper of all Sour cherries. Highest market prices. Most popular in canneries. When preserved, it is always attractive appearance and of extra good quality.

EARLY RICHMOND. Exceedingly hardy and productive.

ENGLISH MORELLO. Large, blackish red Cherry. Hardy and productive. Very late.

HARRISON GROWN CHERRY TREES

Budded from bearing commercial orchards of superior strains. All Cherries are budded on hardy grown, whole root seedlings, which, in our most favorable soil, form a large, fibrous, well-proportioned root system, which is exceedingly important for the proper growth of cherries. Highest quality at most attractive prices.

MONTMORENCY—The Best Sour Cherry, Easy to Grow

SWEET CHERRIES

What fruit is more pleasing than the Sweet Cherry? The ideal fruit to plant in the back yard. We have a good supply of first-class trees in the following varieties:

BING. Very large, dark brown, flesh firm, sweet. Mid-season.

BLACK TARTARIAN. Very large, sweet, purplish black color, juicy rich flavor. Heavy bearer and most profitable sweet variety grown. Early.

GOLDEN WAX. Large, yellow, fine flavor. Bears bumper crops. Early, grown Mid-season.

GOVERNOR WOOD. Large, light yellow, medium firmness, sweet flavor.

LAMBERT. Extra large, sweet, firm, very juicy. Mid-season.

NAPOLEON (Royal Ann). Large, pale yellow, light red bluish, sweet, excellent flavor, prolific bearer. Mid-season.

SENECA. Resembles Black Tartarian, but ripens two weeks earlier, rich, sweet flavor.

SCHMIDT (Schmidt's Bigarreau). Large, sweet, deep black, tender, fine flavor. Mid-season.

WINDSOR. Large, sweet, almost black, fine quality. Valuable late variety.

YELLOW SPANISH. Large, sweet, yellow with red tinge. One of the most beautiful and popular of the light-colored Cherries. Heavy bearer. Mid-season.

BLACK TARTARIAN SWEET CHERRIES—Juicy, Rich Flavored

HANSEN'S IMPROVED

An ornamental shrub producing delicious fruit. Very easy to grow, highly productive and hardy. The fruit is large, black and sweet, wonderful to eat right from the bush. Introduced by Dr. Hansen of the South Dakota Experimental Station. Leaves are silvery green, turning to red in autumn. Attractive white blossoms add to landscape effect. 3-Year Bushes, Bearing Size, \$1.50 each; 10 for \$13.00.

Grow Finer Flavored Berries

With Harrisons' ^{Select Certified} Raspberry Plants

LATHAM

WORLD'S LEADING RASPBERRY

The sensational yields of this variety have attracted the attention of growers everywhere, and all those who have given it a trial are praising the many unusual features they have found in Latham. After thoroughly testing Latham we find it a remarkable variety in every respect; you will be both delighted and surprised after giving it a trial.

Large Berries—

Tremendously Productive

Latham is a tall, vigorous grower, the canes are extra heavy, well able to support the load of fruit. The foliage is healthy, dark green, tough and leathery, highly resistant to insects. Latham ripens with Cuthbert, covers a longer fruiting season. The berries are beauties and will cause a sensation wherever they are shown. Many are over an inch in diameter and they hold this size to the end of the season. Color dark rich red.

A Blue Ribbon Winner for the Home and Commercial Grower. It simply cannot be equalled.

Harrisons' "SELECTED STRAIN" Raspberry Plants. Triple Inspected, Disease Free. Preferred by Growers in Every State in the Union.

CUMBERLAND

The Most Popular Black Raspberry

CUMBERLAND

Mid-season to late. This is the most popular Blackcap of the present time, because of its great size, firmness, and productiveness. The fruit is the largest of the Raspberry family, and is of such handsome appearance that it is sure to bring the top prices on the market.

A BIG CROP EVERY YEAR

Cumberland has never been known to fail to produce a big crop every year. This variety is perfectly hardy and tremendously productive, the bushes are vigorous, upright and healthy. Berries are glossy black in color, not equalled by any other variety in quality, flavor and appearance. It's good to eat and good to sell.

PLANT ONLY DISEASE-FREE PLANTS

A good patch of Black Raspberries yields big profits, but in order to get profitable yields it is absolutely necessary to set only vigorous, disease-free plants. Harrisons' selected-certified Black Raspberries are the best plants to be had. Under ordinary conditions they will yield from 1500 to 3000 quarts per acre, whereas weak or run-down diseased plantings only yield around 400 to 800 quarts per acre. The best plants are cheapest in the long run.

NEW LOGAN. A new Black Raspberry variety; probably its two most noteworthy characteristics are that it ripens about a week earlier and is more resistant to the virus diseases. A very productive variety and fruit of good size and quality. If an early berry is desired, it is one of the best. It does not crumble.

INCREASE YOUR PROFITS WITH

New the Sensational Boysenberry

**HARRISON
BROTHERS
BERLIN,
MARYLAND**

The New Mammoth Berry That Will Revolutionize the Berry-Growing Industry

Two Inches In Length

The new Boysenberry is truly a glorified Youngberry. We offer it again because of the tremendous size of the berries; because of the heavy, rich, juicy flavor; because we think that it has the highest yield of any berry now.

It is often called a Blackberry. They produce a larger crop than the true blackberries, but because each berry is so much larger, it is not so heavy, nor so full of its own.

No. 1 plants: 3 for \$1.35; 6 for \$2.40; 12 for \$3.50; 25 for \$5.50; 50 for \$9.50; 100 for \$16.50; 250 for \$35.00.

ELDORADO Blackberry

A Heavy Yielding Blackberry that Spells Success Everywhere

The Heavy Yielding Variety. The heavy producing quality of Eldorado has placed it first among blackberries. Its berries are of enormous size, shiny jet-black sweet flavor.

**BOYSENBERRIES—
A Real Treat,
Easy to Grow**

For Home or Commercial Planting. It is valuable for all purposes, both home and commercial, being so firm that it will remain in good condition for three and four days. It can be sent to distant markets where it always commands the highest price. This variety is making big money for other growers and it will do the same for you.

PRICES OF BLACKBERRIES: Selected plants, 1-yr. No. 1 grade, 6 for \$1.70; 12 for \$2.45; 25 for \$3.85; 50 for \$6.65; 100 for \$11.55; 250 for \$25.00.

LUCRETIA DEWBERRY

Long, mammoth black berries, recognized as the leading variety. Incomparably better in every way than any Blackberry you have ever seen or tasted. Lucretia is a very early bearer, ripening from a week to ten days before even the earliest Blackberries. Big, uniform size makes them top-notchers in price on any market. For real profits and for home and commercial growing, Lucretia is the only variety of importance.

No. 1 plants: 6 for \$1.20; 12 for \$1.75; 25 for \$2.75; 50 for \$4.75; 100 for \$8.25; 250 for \$17.80.

GOOSEBERRIES

RED JACKET. Big, roundish oblong berries with a mild, sweet flavor. Delicious for fancy desserts, salads, preserves, pies, etc. Bushes lovely as shrubs. Small yellow bloom.

DOWNING (Green). Large greenish yellow variety favored for shipping and canning. Highly flavored.

Large 1-yr. bushes, \$1.00 each; 3 for \$2.85; 6 for \$5.40; 10 for \$8.00.

CURRANTS

NEW RED LAKE. Biggest, sweetest, finest improved Red Currant on the market. Large bunches, produced in profusion. Extra hardy.

WILDER. One of the strongest growers and most productive. Bunch and berry large, bright, attractive red color.

Large 1-yr. bushes, \$1.00 each; 3 for \$2.85; 6 for \$5.40; 10 for \$8.00.

Harrison Brothers Selected Varieties Grapes

AGAWAM. Red. Mid-season. Large, thick skin, aromatic flavor. Vines strong, rank grower. Hardy and productive. Ripens with Concord.

CACO. Red. Mid-season. Fruit is very large and handsome. A rich wine-red color. Not a very rank grower and a shy bearer.

CATAWBA. Red. Very late. Large. Flesh pulpy with rich, vinous flavor. Quality good. A very desirable variety.

DELAWARE. Red. Early mid-season. Bunch and berry good size, compact, flesh juicy, very sweet and refreshing. Vine very hardy and productive. A slow grower. Requires rich soil, good culture, close pruning.

FREDONIA. Blue. Very early. Originated by New York Experimental Station. The bunch and berry are large, with excellent, juicy, delicious flavor. Vigorous and productive. Ripens fully ten days before Moore's Early.

NIAGARA. White. Mid-season. Best of the standard light colored Grapes. Bunches of large greenish white berries change to pale yellow when fully ripe. A rank grower and very productive. Popular with vineyardists and home gardeners in the North, as well as the South.

WORDEN. Blue. This excellent Grape is as hardy, healthy, vigorous and productive as Concord, of which it is a seedling, but better in quality. It is sweeter, larger in bunch and berry. Several days earlier. Valuable for garden and vineyard.

PLANT THE BEST

The soil on which our vines are grown is especially adapted to root growth. Our propagating stock is selected from healthy, vigorous, heavy bearing vines. This results in a vine that will give you 100 per cent satisfaction in your vineyards.

Harrison Brothers Grow at Berlin, Maryland.
The Grape Vines We Sell

Blue, mid-season. The most popular and extensively planted Grape in America. It adapts itself to varying conditions and is grown in most every state in the union. Large, compact bunches of dark purplish black colored berries. The berries are covered with a rich bloom, skin is tender, but is sufficiently firm to carry to distant markets; flesh is juicy, sweet and tender.

Exceptionally Heavy Yields

Concord is a very vigorous grower, hardy and very productive. It ripens during mid-season, and is rated as the best money-making commercial variety.

Prices: 90c each; 3 for \$2.40; 6 for \$4.20; 10 for \$6.50; 25 for \$13.75; 50 for \$25.00.

Four Undisputed Strawberry Leaders

PREMIER King of the Early Berries

Too well known to need much description. The standard early berry by which all other varieties are judged. Holds all records for big crops and big profits. Premier has filled more crates, made more dollars, and brought joy to more Strawberry growers than any other variety ever grown.

Adapted to All Soils—Heavy Yielder. It thrives on most any type of soil and is a rampant plant maker. Premier fruits extra early when berries are selling at a high price. It is a big yielder of big, bright red berries of fine flavor. For home garden, local markets, or for shipping moderate distances it has outclassed all the other varieties.

FAIRFAX, Early

The Sugar-Saving Berry

Color is a deep, full red; its rich, sweet flavor brings buyers back for more. Fairfax berries are exceptionally firm, making it an ideal shipper. Superior to all for home use, equal to any for commercial planting.

STREAMLINER EVERBEARER

CHESAPEAKE Late Berry The Favorite

It is a good producer of very large berries that hold their shape well until the end of the season. It does not yield as many berries per acre as some of the early varieties, but the size and quality of its fruit enables it to sell for a much better price which offsets this disadvantage. The berries are firm enough to ship to distant markets and to arrive in first class condition. An exceedingly valuable commercial berry but equally adapted for home planting. We offer a selected "Big Yield" strain.

BLAKEMORE

"Jo Strawberry has become so popular so quickly as Blakemore. It is the most popular variety in all America. Ripens several days before Premier and is equally dependable, producing big crops every year. The plant is healthy and stands up well during drought. The berries are large, firm, an attractive red and good quality. Fine for canning and preserving because it holds its color and shape so well.

DORSETT, Early

Large Fruit—Vigorous Grower—Heavy Crops

Dorsett berries average large size, considerably larger than the Premier; in fact, their size is comparative with Chesapeake, which is the outstanding late berry. Plant growth is exceedingly vigorous, being far more vigorous than most other varieties. Dorsett yields large crops of fancy, light red berries.

STRAWBERRY GARDEN OFFER

No. 21

25 BIG JOE	25 PREMIER
25 FAIRFAX	25 CHESAPEAKE
ALL FOR \$3.75	

BIG JOE The Old Reliable Mid-Season Variety

LARGE YIELD—FANCY FRUIT—FINE FLAVOR

Big Joe is a heavy producer of large, brilliant red berries of extra fine flavor and is firm enough to withstand long shipments. The plants are good growers and heavy yielders. This variety succeeds on a types of soil but does extra well with good care and fertility. Be sure to include Big Joe in your planting this year. Our big yield strain insures big crops.

CATSKILL Mid-Season

A mid-season berry that will produce the largest crops of bigger berries of any mid-season variety. Catskill is entirely satisfactory as to firmness, quality, color and attractiveness, season of ripening and climatic adaptation. The highest record of marketable berries was made with this variety. In shipping respects it ranks with Chesapeake and Lupton. It is rated equally

as attractive as Fairfax or Dorsett. The berries are borne on rather long fruiting stems which makes it easier to get at in picking.

RED STAR HERE'S A NEW ONE Extra Good—Very Late

This is the other new one by the U.S.D.A., and a cross between the Chesapeake and Fairfax. This is the late one. Berries are large, and are borne on short, stout stems that stay well under the leaves, thus protecting them from late frosts. Makes a good fruiting row, and plenty of money can be made from growing this one as late berries always bring a high price.

STREAMLINER

The Greatest Everbearing Strawberry

**SWEET AS HONEY — EXTRA LARGE
EXCELLENT FOR EATING FRESH OR FREEZING
MAKES HEAVY FRUITING BED**

● Berries in 90 days or less. No need to wait several months. Plants planted in March or April will commence bearing in early July and bear until frost.

● Three Big Crops From One Planting. Streamliner needs no nursing along as some everbearers do. They are thrifty growers, and do not require exacting soil requirements. Pick your first crop this summer and fall, second crop next June, third crop the following summer and fall.

● It costs less to grow your own berries if you plant Streamliner. Easy to grow, just space them 12 to 15 inches apart in the row with the rows 2½ to 3½ feet apart.

● Profitable to raise. Grow all the berries you need for your own use and sell the rest to your neighbors.

HARRISONS' BIG YIELD STRAWBERRY PLANTS

EVERMORE (Minnesota 1166) New Everbearer

BEARS IN 90 DAYS

No long waiting for delicious Strawberries. Evermore is a rugged everbearer, originated in the North. It can stand cold winters, dry summers and light soils.

Big, dark-red-all-the-way-through berries, sweet and not too acid. You will like them. A new variety—heavy producer of good berries

Evermore

Harrisons' Everbearing MASTODON

A TRIPLE YIELD

- 1—Plant this spring, 1947.
- 2—Pick first crop, July to frost, 1947.
- 3—Pick second crop, June, 1948.
- 4—Pick third crop, August to frost, 1948.

3 REAL CROPS — 3 BIG PROFITS

Bears in 90 Days, and, too, it's the Best Family Garden Strawberry—Loads of Big Berries in 90 Days

Unlike the other varieties, Mastodon begins to bear luscious berries 3 months after planting and bears three big crops in 18 months. Customers have reported yields as high as three quarts per plant the first fall.

WHY WAIT A WHOLE YEAR?

Plant Harrisons' "Big Yield" Mastodon this spring, and grow your own berries this summer and fall, instead of buying them. If you have more than you can use, they are easily disposed of in the nearby community, where they will bring top prices.

Gem Everbearing

Gem will start to bear the first season planted and will bear large crops until frost. These berries bring the highest prices in the markets or on a roadside stand. There is a great opportunity for making money by planting Gem. Get your patch started this season; they will give you enough berries for your own family and some to sell to your neighbors or ship to the city markets.

BEARS 100 DAYS AFTER PLANTING

EVERY HOME GARDEN SHOULD HAVE EVERBEARING STRAWBERRIES

Triple Inspected—By U. S. Government and State of Maryland Inspectors; also by Harrisons' expert Strawberry plantmen. All Strawberry plants are guaranteed to be free from all diseases and insects.

Harrison Strawberry Plants Are Bred Up for Bigger Yields and Tell the Story at Harvest Time.

A Field of Harrisons' Selected Strawberry Plants

NEW GIANT Cultivated Blueberries

- Profitable to Grow
- Delicious Berries
- Very Ornamental

Once Planted Lasts a Lifetime

Blueberries are not only the largest money makers of all time commercially, but are also one of the easiest fruits to grow. The berries bring up to 75c per quart—\$400.00 per acre the third year. They are exquisitely mild, sweet and delicious and bring highest prices on the market. The demand for Blueberries is practically unlimited. A planting lasts a lifetime with proper care and the plants will pay for themselves their first crop. A few bushes planted in the shrub border and in the garden will be sufficient to supply you with berries for years.

Blueberries—Easy to Grow

Set the bushes 5 by 7 feet apart in moist, acid soil. If your soil is sweet, it may be made acid by mixing with it a little quantity of acid peat, rotted leaves and pine needles, or similar material. Fruit ripens over a period of several weeks. Plant two or more varieties so as to insure proper pollination.

Very Ornamental

As an ornamental shrub the Blueberry cannot be surpassed. Full of lovely pink blooms, which open to bell-shaped, white flowers in June. Plants are compact, low growing, having waxy green leaves which turn red during the fall. Twigs are reddish brown and very showy during the winter.

BLUEBERRIES—Ornamental as Well as Fruitful
Jumbo Size—Bear First Year Planted

SPECIAL JUMBO SIZE BLUEBERRY PLANTS

Have already fruited in the nursery. Ready to bear big crops of luscious berries on your own grounds and are as easily grown as a shrub or rose bush. You can pick delicious berries the first season planted and each year they will produce a larger crop with very little attention. We only have a few hundred of these jumbo sized plants to offer. Can supply in the following varieties only: Cabot, Rancocas, Concord, Rubel and Jersey.

Prices: Jumbo size, 4-year-old, 2 to 3 ft., \$4.25 each; 3 for \$12.00; 10 for \$37.50.

FIVE LEADING BLUEBERRIES Listed in Order of Ripening

CABOT. Plants seldom exceed three feet in height and make a broad, low bush. The color of the new growth in winter is a light red over olive. The large berries have a delicious sub-acid flavor.

RANCOCAS. The bush of slender, vigorous, upright habit rarely surpasses five feet in height. The winter twigs are a dark red. The berries are somewhat larger than those of Rubel and begin to ripen several days earlier.

CONCORD. The bush is of upright habit and at maturity exceeds six feet in height. The young growth is bright red in winter. The berries are large, frequently reaching three quarters of an inch in diameter. They usually ripen a few days earlier than Rubel and are fine in flavor and appearance.

RUBEL. A vigorous, prolific variety. We developed bushes of six feet in height. The winter color of the young growth is a rich red. The large berries of the color and ready to pick the first week in July.

JERSEY. The bush is of vigorous habit and grows very large. The winter color of the young growth is a light red over golden brown. The berries are the largest of any here listed, light blue, and ripen about the same time as Rubel.

Grow Your Own

DELICIOUS! NUTRITIOUS!

ASPARAGUS

*It's Easy
with*

Harrisons' "Big Yield Strain"

MARY WASHINGTON

Highly Profitable and Easily Grown

Being the first vegetable to come in the spring it always brings a high price on the markets. Stalks being delicious and very healthful, every garden should have a generous supply and when properly set and cared for will last a lifetime.

**The Famous True-to-Name
Mary Washington**

Plant This Pedigreed Strain

There is no variety of asparagus as good as Mary Washington and whether you are growing for home use only or for market you cannot afford to grow any other. This wonderful new asparagus was developed and introduced by the U. S. Department of Agriculture and although it is just a recent introduction it has become famous the country over.

Rust Resistant—Profitable

Growers everywhere are discarding all other varieties in favor of the famous Mary Washington, because it is earlier, the stalks are larger, more tender and more productive than any other variety and more highly immune to rust, which means that one planting will produce profitable crops for many years.

Large—Early—Tender—Juicy

Asparagus buyers now demand Mary Washington and are willing to pay fancy prices to get it. The demand for Mary Washington is tremendous because when it is once eaten, no other variety will give satisfaction. The stalks are purplish green color, large, tender and juicy. A very rapid grower, which means many cuttings.

**Prices of Genuine Pedigreed Mary Washington
Asparagus Roots**

New Gigantic

MacDonald Rhubarb

If you want something different, something delicious in garden fruits, then plant some of this grand new MacDonald Rhubarb.

Stalks are of giant size on mature plants, and a rich rosy red in color. This beautiful color carries through the stalk. Sauce made from it has the red color of a dish of Strawberries. Flavor is mild and pleasing. This new Rhubarb does **not** send up seed stalks and never becomes tough or stringy. Just cut in small chunks and cook. Do **not** remove the tender skin; it cooks right up with the stalk.

Heavy plants: \$1.00 each; 6 for \$5.40.

SAVE A YEAR!

PLANT JUMBO THREE-YEAR

Mary Washington Asparagus Roots

Yes, you can grow your own delicious tender Asparagus quick by planting our jumbo size roots. These roots are the cream of our three-year-old crop and have already borne large, early, tender, juicy Asparagus in the nursery. This is the selected pedigreed Mary Washington strain and is far superior to other kinds.

THE FAMOUS CALIFORNIA PRIVET—The Best Low Cost Hedge—Grown by Harrison Brothers, Berlin, Maryland

California Privet is the Leading Low Cost Hedge Plant

CALIFORNIA PRIVET

(*Ligustrum ovalifolium*)

This is the universal hedge in the East, a fact proving that Privet has greater merit under ordinary conditions for this purpose than any other plant. For live fences at homes, towns and country homes it is the very best of all materials. On public grounds of all kinds, parks and cemeteries, along roads and paths, on factory grounds, and on newly subdivided areas near towns, nothing else can be used in its place, and in this place it is indispensable. It is the best of all hardy hedge plants. Can be easily kept at any height desired; has glossy, deep green leaves, and holds them until late fall. Its strong, quick upright growth makes it useful for screening out unsightly objects.

SPIRAEA VAN HOUTTEI
Always Makes an Attractive Hedge

GREEN BARBERRY

(*Berberis thunbergii*)

The best low dense hedge plant grown. Its abundant, small light green leaves, which turn to rich colors in autumn, and its wealth of scarlet berries make it very attractive. Extremely hardy and requires but little pruning. Ornamental and graceful the whole year.

SPIRAEA VAN HOUTTEI

This grand shrub has done more to beautify the homes of America than any other variety. It is valuable as a specimen in groups in border planting and for hedges. The branches are slender, drooping, covered with white flowers in April or early May. It grows in any place either in full sunlight or partial shade. Disease resistant, hardy, thrives under adverse conditions. Ultimate height 6 to 8 feet but can be kept lower by trimming. The most popular shrub. We have an extra fine supply of first class plants this year and are pricing them especially low.

ENGLISH IVY—Evergreen

HOW TO PLANT PRIVET

California Privet grows faster than any other hedge plant. For a thick hedge close to the ground the plants must be set close together about 6 to 12 inches apart. Plow or dig a trench about 1 foot deep and 1½ to 2 feet wide. The plants should be planted deep enough so that the soil covers about the first three inches of the lowest branches. Fill around the plants with top soil and firm the soil. Water thoroughly after planting. Cut plants back to about 4 inches from the ground after planting; this will result in a dense hedge at the bottom of the plants. After hedge reaches desired height it can be kept trimmed so as to remain at that height.

Harrison's

HARDY VINES

NATURE'S DRAPERIES

BOSTON or JAPANESE IVY (*Ampelopsis Veitchii*). A popular climber, clinging firmly to brick, stone or other material; deep, glossy green, ivy-shaped foliage which turns to cream and gold color in autumn. Price: 75c each.

CHINESE WISTARIA. A rampant growing, clinging vine. Blue flowers in large, drooping clusters during May and June. Price: \$1.25 each.

ENGLISH IVY (*Hedera Helix*). The most popular evergreen vine; large, deep green, glossy foliage. Excellent for covering walls. Useful for shady locations. Price: 75c each.

HALL'S HONEYSUCKLE. Deep glossy green foliage, fragrant flowers from July to fall. Price: 60c each.

SWEET AUTUMN CLEMATIS (*Clematis paniculata*). A splendid climber for covering porches and trellises. Flowers snowy white; produced in immense quantities during late summer and autumn. Price: 75c each.

SILVER LACE VINE (*Polygonum Auberti*). Will rapidly grow 20 feet or more. Forms cloud of lacy, misty white, shot with tints of cream and pale rose. Green foliage, lightly bronzed at tips. Price: \$1.00 each.

GREEN BARBERRY—Green in the summer, turning to a brilliant coppery red in late fall. A protection against small animals, because of the sharp thorns

Aristocrats Among Roses

New Beauty for Your Garden
Everblooming Hybrid Teas—bloom all summer

Rose Varieties

AMI QUINARD. Very dark crimson-maroon, semi-double flowers. One of the darkest Roses grown and under certain conditions appear to be black. Very free bloomer, healthy grower. Most spectacular dark Rose.

CONDESA DE SASTAGO. Marvelously colored Rose with large cupped flowers of coppery red inside and rich yellow outside. A profuse bloomer at all times, keeps well when cut, and is spicily fragrant. Compares with the Radiance Rose in vigor and hardiness.

ETOILE DE HOLLANDE. At present considered most popular of crimson Hybrid Teas. Velvety scarlet-crimson with delicious fragrance, and enormous petals. It charms continuously with its delightful color, vigorous growth, and well formed flowers on long stems. Faultless.

GOLDEN DAWN. Considered the finest yellow Rose. Blooms of soft lemon-yellow tinted with old rose markings, long-lasting fragrance of real tea scent. Hardy, bushy, medium height, and very vigorous.

KAISERIN AUGUSTE VIKTORIA. Perfect creamy white bloom, slightly tinged with lemon, large and full. Long, shapely buds open to full-petaled, deliciously scented bloom. An old favorite that even today has not been surpassed.

MRS. CHAS. BELL. A delicate, refined shell-pink shade, intensely fragrant. Very vigorous, tall and bushy. A sport of the ever popular Pink Radiance, and sometimes called "Shell-Pink Radiance." An exquisite Rose that should be in every garden.

Paul's Scarlet Climber

Large, intense scarlet blooms; freely produced. It is strong and perfectly hardy. The most popular climbing Rose.

Same price as other varieties of Roses.

HARDY ROSE PLANTS

We absolutely guarantee Harrison Bud-Selected Roses, variety for variety, to be as hardy or harder than Roses grown in any locality north of us.

Condesa de Sastago

K. A. Viktoria

Pink Radiance

Red Radiance

MRS. E. P. THOM. Deep yellow buds, with carmine markings, opening to semi-double, clear lemon-yellow, never fading blooms. Similar to Souv. de Claudius Pernet, being among the best yellows, grown successfully throughout the United States.

MRS. PIERRE S. DU PONT. Medium sized reddish gold buds open to a semi-double golden yellow that is a glorious sight from early summer until freezing weather. Moderately fragrant. Vigorous, compact, glossy foliage. The "ace" of the golden yellow Roses.

PINK RADIANCE. A brilliant carmine-pink with yellow shading at base of petals, having a light silvery tone on the inside, and deeper on the outside. Vigorous, free bloomer, parent of Red Radiance. Among the oldest Roses, it has made good everywhere.

PRES. HERBERT HOOVER. One of the outstanding Roses. A glorious new Rose of vivid cerise-red toned with yellow, orange and scarlet, richly perfumed and free flowering.

RED RADIANCE. A sport of the famous Radiance and identical in all characteristics except color. A brilliant cerise-red color, and intensely fragrant. Tall and bushy, healthy foliage and excellent blooming qualities. The favorite red Rose of America's millions.

TALISMAN. A multi-colored glorious combination of orange, yellow and rose-red. They simply eclipse other Roses in autumn. Fine for decoration and cutting. The triple-tone flowers are produced all season.

The Colorful PEONIES

THEY RIVAL THE ROSE

Once planted they last for years. There should be several planted in every yard. Their large bright colored flowers during May and June furnish an abundance of flowers for the home. Can supply the following colors:

WHITE PINK RED

State color desired.

Prices: 75c each; 3 for \$1.95; 10 for \$5.50.

MAKE YOUR GARDEN A SHOW PLACE

In making the selections offered here, the trees, shrubs and roses will give you a distinctive garden such as your neighbors cannot duplicate with ordinary material. This is your opportunity to enjoy the finest creations of the horticultural world—trees and flowers that are unusual in form and color. Make up your order now from the super-quality offerings contained in this planting guide

Pyramidal Arbor-Vitae

(*Thuja occidentalis pyramidalis*)

A beautiful evergreen that should be included in every planting. It grows tall and narrow, requires no trimming, and retains its bright green color throughout the whole year. A pair of them placed at the entrance of the home makes a superb showing. Our pyramidal arbor-vitae are grown with extreme care and each one is a specimen. Prices: 18 to 24 inch, \$2.25 each; 2 to 3 ft., \$3.00 each; 3 to 4 ft., \$4.25 each.

Compact Globular Arbor-Vitae

(*Thuja occidentalis compacta*)

A compact, globe-shape, dark green foliage. A low growing plant for massing against the lower evergreens in foundation plantings. Prices: 12 to 15 inch, \$1.75 each; 15 to 18 inch, \$2.25 each; 18 to 24 inch, \$3.00 each.

The Charming Irish Juniper

(*Juniperus communis hibernica*)

Forms a narrow and dense column, compact, bluish green foliage. Most attractive when planted around foundation of a home, at corners and entrances. Widely used in formal gardens. Prices: 4 to 5 ft., \$5.00 each; 5 to 6 ft., \$6.50 each.

ALL EVERGREENS MOSS BALLED

All evergreens are taken up expertly to secure the tender roots, the soil removed, and then the roots dipped in Transplantone and balled in wet moss and wrapped. By this method we are now able to eliminate 50 to 60 pounds of soil, making low cost express shipments possible. This method also insures excellent growth and quicker root action. In planting remove wrapping and use moss in hole around roots. If desired balled in soil and burlap, add \$1.50 per plant to cover additional handling and special packing.

IRISH JUNIPER

COMPACT GLOBULAR ARBOR-VITAE

PYRAMIDAL ARBOR-VITAE

Berckmann's Golden Arbor-Vitae

(*Biota aurea nana*)

Dwarf, compact evergreens. Foliage a bright lustrous yellow. Fine for adding color in the planting. Highly admired by all who see it. Prices: 12 to 15 inch, \$2.00; 15 to 18 inch, \$2.50; 18 to 24 inch, \$3.50.

BERCKMANN'S GOLDEN ARBOR-VITAE

Spiny Greek Juniper

Upright columnar habit and bluish green foliage. The growth is so slow that the tree is well adapted for foundation plantings and other situations requiring dwarf trees. Prices: 18 to 24 inches, \$3.50 each; 2 to 3 ft., \$4.75 each.

Spreading Yew

(*Taxus cuspidata*)

The beautiful Yew of moderate bushy growth, usually grows wider than it does tall, starts branching from the bottom, developing into a bush form. The spreading branches are densely clothed with short leaves of dull green. It is the most attractive spreading evergreen, will grow in semi-shady locations. Hardest of all Yews. By trimming the side branches the plant can be made to grow semi-upright and likewise by trimming the top branches the plant can be made to develop lower to the ground. Can also be trimmed into globe shape. Prices: 12 to 15 inch, \$2.50 each; 15 to 18 inch, \$3.00 each; 18 to 24 inch, \$4.00 each.

SPINY GREEK JUNIPER

Do Not Confuse Harrison's Hi-Quality Evergreens with Bed-Grown Stock. This Type of Stock May be as Tall as the Plants We Offer, They Do Not Have the Body and Are Useless for Immediate Landscape Effect and Oftentimes Require Several Years' Growth Before They are Satisfactory.

EVERGREENS

IRISH-YEW *taxus baccata Hibernica*

Fine Soft Lustrous Foliage

An ARISTOCRAT from OLD IRELAND

This evergreen is the aristocratic member of the Yew family. It grows tall and narrow with stout, crowded branches and spirally arranged leaves which are dark green in color. This Yew is very scarce, but everyone who sees it is enthusiastic about it. Formerly it was imported from Europe, but after all importations were discontinued by the Federal Government, American nurserymen were unable to supply their customers. Fortunately, we had some specimen plants in our nurseries from which we were able to propagate.

PRICES:		Each	Each

HANDSOME IRISH YEW

BEAUTIFUL RETINOSPORAS

Dainty and Feathery—So Picturesque in the Foundation or Rockery

PLUME-LIKE RETINOSPORA (*Retinospora plumosa*). A handsome evergreen with feathery, light green foliage, more beautiful than a fern. Excellent for foundation plantings; can be kept pruned to any desired height.

VEITCH'S SILVER RETINOSPORA (*Retinospora squarrosa Veitchi*). Foliage silvery blue, feathery and dense, giving a soft, woolly appearance. Broad, pyramidal outline, can be kept to any height by trimming. One of the best Retinosporas.

GOLDEN PLUME-LIKE RETINOSPORA

Our Most Popular Golden Tinted Evergreen

A handsome golden colored evergreen that is admired by all. Its pleasing shade provides the right amount of contrast when it is planted along with other evergreens along its side or back of it. Feathery, fernlike foliage can be kept trimmed to any size. No home foundation plantings are complete without this remarkable healthy evergreen.

PRICES FOR THREE ABOVE RETINOSPORAS

15 to 18 inches . . .	3.00		

PFITZER'S JUNIPER (*Juniperus chinensis pfitzeriana*)

The most popular of all spreading evergreens. Its peculiarly graceful, distinctive manner, plus an unusually hardy nature, makes it particularly fascinating and desirable for foundation planting.

	Each
15 to 18 inches	\$3.00
18 to 24 inches	4.00

HICKS' YEW

HICKS' YEW (*Taxus cuspidata Hicksi*). Another form of Yew that is very similar to the Irish Yew, but is a much faster grower. The branches ascend almost vertically, generally growing with many stems. Its rich dark glossy green makes it much more attractive than Arbor-Vitae or Junipers. We can unhesitatingly recommend it for planting in all sections. It has proven to be perfectly hardy. If extremely narrow effect is desired it can be obtained by trimming the sides of the plant when it is small. This variety is extensively used for making high class evergreen hedges.

12 to 15 inches	Each, \$2.50	18 to 24 inches	Each, \$4.00
15 to 18 inches	Each, \$3.00	2 to 2 1/2 feet	Each, \$5.00

"The Rare FRANKLINIA"

(*Franklinia Altamaha*)

Beautiful blooms and blazing fall foliage bring beauty to any planting. Flowers start opening in mid-August and continue until hard frosts. Flower buds appear like small balls covered with whitish green satin; when they unfold, the guard petals emerge satiny snow-white, elaborately frilled and pleated. The showy frilly chalice, 3 inches in diameter and of piquant irregularity, holds a sumptuous mass of the rich orange golden stamens having a delicate balmy fragrance. The young leaves unfold a delicate bronze-red, 5 to 6 inches long at maturity by about one-third as wide; a rich dark green with red veining. In autumn the whole tree blazes a rich warm color. Produces a beautiful effect in any planting. 2 to 3 ft., \$3.50 each.

BECHTEL'S FLOWERING CRAB APPLE

Only genuine double-flowered Crab. When in bloom, appears to be covered with delicate pink, perfectly double, small roses of delicious fragrance. Best flowering Crab Apple.

PURPLE-LEAVED OTHELLO PLUM

When You Think of Your Shade Trees, Buy Direct

NORTHERN STRAIN

CHINESE ELM

Grows 20 Feet in Four Years

Because of its beauty and extremely rapid growth, Chinese Elm has become a leading shade tree of America. It is planted in every state, and like its native country of Korea, withstands intense cold and extreme heat. It makes excellent shade in five short years, averaging about 5 feet growth annually. It is by far the fastest growing hard-wooded shade tree. It resembles the American Elm except the leaves are smaller, with the gracefulness of a Cut-Leaf Birch. **Prices: 6 to 8 ft., \$2.25 each. 8 to 10 ft., \$3.00 each**

ORIENTAL PLANE

(*Platanus orientalis*)

A rapid, upright, clean growing shade tree, long lived, beautiful dense foliage. A superb tree of gigantic proportions, which is very hardy. The Oriental Plane, being originally an imported tree during the past generation, has rapidly won high popularity in recent years due to its many merits which have made it the most useful and the most sought for shade tree for lawns, parks, streets and highway plantings. Harrison's Nurseries are specializing in growing Oriental Planes and we are the largest growers in America. **Prices: 6 to 8 ft., \$3.00 each. 8 to 10 ft., \$4.00 each. 10 to 12 ft., \$5.50 each. 12 to 14 ft., \$8.00 each**

SILVER MAPLE

(*Acer dasycarpum*)

The name comes from the color of leaves. Underneath, these are the same shade as new, bright silver; on top they are light green. Many of them are carried on their edges and when wind blows the trees are alive with silver and green flashes. In the fall the leaves fade to pale yellow. Growth is faster than that of any other Maple, and probably faster than that of any other shade tree. Branches are slim and dainty rather than heavy, and the form of growth is spreading. Gets very large eventually—as high as 120 feet sometimes—and does well over nearly all the United States. Makes splendid quick screens or quick shade. On streets and in parks is extensively planted, and is very fine. **Prices: 6 to 8 ft., \$2.25 each. 8 to 10 ft., \$3.00 each**

ORIENTAL PLANE
The Famous Light Bark Tree

Plant Paper Shell PECAN TREES for Shade and Nuts

PAPER SHELL PECAN

Medium to large nuts; oblong thin shell, rich flavor. Good grower. The best type Pecan grown. **2 to 3 ft., \$3.00 each. 3 to 4 ft., \$4.00 each. 4 to 5 ft., \$5.00 each**

BLACK WALNUT

(*Juglans nigra*)

Rapid grower, spreading branches, large delicious nuts, prolific bearer. **2 to 3 ft. \$2.00 each**

PECANS—Abundant Nuts in Winter

AMERICAN PERSIMMON

Small trees highly ornamental and producing an abundance of pleasingly astringent spicy fruits, highly prized when gathered after the frosts. **2 to 3 feet, \$2.00 each.**

Harrisons' **STATELY PIN OAKS**

(*Quercus palustris*)

America's Favorite Oak Tree

The tree of trees—no other tree is more beautiful—once planted the Pin Oak continues to grow for a lifetime. Some of the finest, most attractive plantings depend almost entirely on the stately Pin Oak for their landscape appeal.

Beautiful Bronze Color During Autumn

Deeply cut, bright, fresh green foliage during the summer, turning to a bright bronze color during autumn. The most graceful tree for the lawn, equally as desirable for street or roadside planting.

YOU'LL NEVER REGRET PLANTING PIN OAKS.

Prices: 6 to 8 ft., \$3.75 each. 8 to 10 ft., \$5.00 each. 10 to 12 ft., \$7.00 each. 12 to 14 ft., \$10.00 each.

PIN OAK
For Permanence and Dignity

NORWAY MAPLE

(*Acer platanoides*)

Typical Maple leaves, large and bright green, fading to gold in the fall. Trunk and branches are sturdy and strong, lending an effect of ruggedness. Growth is fast. Branches and foliage are thick and compact, and the head, which is round-topped, begins to branch out not far above the ground. The tree is large—towering 50 feet high when fully grown. Splendid trees, most beautiful and desirable. For lining the sides of lanes and roads, for a lawn, to protect the house from sun and weather, for shade, for beauty and satisfaction, and for real permanent worth in all landscape planting there are no other trees in its class. Norway Maples are at home in the mountains, but will thrive at any elevation, and in nearly any soil to be found in this country. **Prices: 6 to 8 ft., \$3.00 each. 8 to 10 ft., \$4.00 each. 10 to 12 ft., \$5.50 each. 12 to 14 ft., \$8.00 each.**

NORWAY MAPLE

BABYLON WEeping WILLOW

(*Salix babylonica*)

A rapid growing, hardy tree, thriving in any moist soil. The Willows are valuable and interesting subjects on account of their graceful aspect. **Prices: 5 to 6 ft., \$1.50 each. 6 to 8 ft., \$2.25 each.**

CROSS COUNTRY PACKING

Our method of packing enables us to ship our shade trees thousands of miles with the trees arriving in field-fresh condition. We guarantee safe arrival no matter where you live.

Harrisons' Can Supply Shade Trees in Car Lots

We invite the City Forester of your Department of Parks; the District Engineer of your State Highway Commission and Landscape Architects to visit us at Berlin, Maryland, to see the Shade Trees growing in our nurseries.

Our tremendous production enables us to supply high quality Shade Trees at very low prices.

BABYLON WEeping WILLOW

LILACS

Harrisons'
BERLIN, MARYLAND GROWN

GORGEOUS LILACS

Lilacs are marvels of beauty and elegance. They are one of the first plants to bloom in the spring. Perfectly hardy in any locality. We can supply the following colors: White, Purple, Pink and Blue. State color desired. Prices: Field-grown plants, \$1.50 each; 2 for \$2.80; 10 for \$13.00.

HYDRANGEA PEE GEE
(*Hydrangea paniculata grandiflora*). Large flowers; first snowy white, then pink, changing to reddish bronze in the fall. Blooms mid-summer to fall. 18 to 24 inches, 90c each.

BLUE HYDRANGEA

BLUE HYDRANGEA

(*Hydrangea Otaksa*)

Old favorite southern Hydrangea. When winters are severe we suggest heeling in. Large balls of blue flowers; very attractive large leaves. Color depends on acidity of soil. Field-grown plants, \$1.50 each; 2 for \$2.80.

FLAMEBUSH

(*Chacnomeles Japonica Rubra Grandiflora*)

This remarkable grafted shrub is one of the first to bloom in the spring. Dazzling deep red flowers followed by fragrant, squirrel-shaped fruits. Waxy dark green foliage. An ideal specimen plant to furnish early coloring in any planting. Prices: Grafted plants, field-grown, 1½ to 2 ft., \$2.50 each.

2 to 3 feet	.80	2.25
3 to 4 feet	1.00	2.85

ALTHEA or ROSE OF SHARON (*Hibiscus syriacus*). The double and single flowers are formed in varying colors. We can supply double red, white with crimson center, and double white.

BUDDLEIA MAGNIFICA. New and undoubtedly the finest of all the summer-flowering Butterfly bushes. Large bright lavender panicles. Flowers do not sunburn as do other varieties. Foliage heavy rich dark green. Very hardy.

DEUTZIA, PRIDE OF ROCHESTER. Double white flowers, slightly tinged with rose, appear in mid-June.

DOGWOOD, RED-BRANCHED. (*Cornus Alba Sibirica*). Bright red bark, white flowers, blue fruit; rapid grower; beautiful winter effect.

GOLDEN BELL (*Forsythia*). Vigorous, upright grower; profusion of yellow flowers in April. One of the best early blooming shrubs.

HONEYSUCKLE, BUSH (*Lonicera Morrowi*). Early white flowers in June, followed by red berries.

SPIREA BILLIARDI. A hardy type of Spirea that grows exceedingly well in dry places. Long, fluffy flower spikes. We offer two colors: white and pink.

SYRINGA, SWEET MOCK ORANGE or GARLAND (*Philadelphus Coronarius*). Of upright habit, and produces in June a wealth of white, fragrant flowers.

SWEET-SCENTED SHRUB (*Calycanthus Florida*). Hardy native with many double, chocolate colored flowers in May. Flowers, leaves and even the wood have a spicy fragrance.

TAMARIX, AFRICAN (*Tamarix Africana*). Feathery gray-green foliage; very showy.

TARTARIAN HONEYSUCKLE (*Lonicera Tatarica*). Very attractive in blossom, producing an abundance of flowers followed by red fruit. We offer pink and white varieties.

WEIGELA, PINK (*Weigela Rosea*). The most popular Weigela sold today. Its delicate pink, bell-shaped flowers are borne in great profusion along arching branches.

CREPE MYRTLE (*Lagerstroemia Indica*). Small green, glossy leaves; very beautiful showy flowers during mid-summer to fall; noticeable object in any landscape. Not hardy north of Mason-Dixon line, but most popular southern shrub. Pink and red varieties. 1 1/2 to 2 ft., \$1.50 each.

QUINCE, FLOWERING (*Cydonia Japonica*). Scarlet flowers in April and May. No doubt one of the most attractive spring blooming shrubs. 1 to 1 1/2 feet, \$1.00 each.

SPIREA ANTHONY WATERER. Crimson flowers in large, flat clusters. Blooms early and continues till fall. 15 to 18 inches, \$1.00 each.

WEIGELA, EVA RATHKE. Very attractive deep carmine-red flowers, making a very showy shrub. 1 1/2 to 2 ft., \$1.00 each; 2 to 3 ft., \$1.25 each.

BEAUTY BUSH. Pink tubular flowers, heavy bloomer, hardy. 2 to 3 ft., \$1.25 each.

SPIREA VAN HOUTTEI—What a Beauty!

THE GLORIOUS SPIREA VAN HOUTTEI

This grand shrub has done more to beautify the homes of America than any other variety. It is valuable as a specimen, in groups, in border planting, and for hedges. The branches are slender, drooping, covered with white flowers in April or early May. It grows in any place either in full sunlight or partial shade. Disease resistant, hardy, thrives under adverse conditions. Ultimate height 6 to 8 feet but can be kept lower by trimming. The most popular shrub. We have an extra fine supply of first class plants this year and are pricing them especially low.

	Each	3	10
1 1/2 to 2 feet	\$0.70	\$1.95	\$6.00
